VENKATESWARLU DERANGULA

Staff Software Engineer | AWS | Kubernetes

vderangula44@gmail.com • +91 7780569119 • www.linkedin.com/in/venkateswarlu-derangula • India • Open to Relocation

Summary

DevOps professional with 10 years of experience in software development and automation, specializing in Terraform and Kubernetes. Noteworthy achievements include driving CI/CD transformations that enhanced deployment frequency and achieving 99.99% availability on production-grade EKS clusters. Proficient in AWS and Azure, with a strong focus on delivering scalable and secure software solutions aligned with engineering best practices.

Skills

Azure • ARM Templates • Azure DevOps • AKS • AWS • EC2 • S3 • RDS • AWS Lambda • CloudWatch • EKS • Kubernetes • Microservices • Docker • Git • Python • DevOps • Cloud Platforms • CICD • Terraform • GitHub Actions • Prometheus • Grafana • Observability • MLOps • GCP • DevSecOps • Airflow • IAC • ELK Stack • Nginx • API Gateway • Jenkins • Ansible • Sonar • GitLab CI

Certifications

AWS Certified Solutions Architect – Professional
Certified Kubernetes Administrator (CKA)
Google Cloud Certified Professional Cloud Architect

Experience

Infinite Computer Solutions — Bengaluru

Technical Lead — 09/2023 - Present

- Provisioned secure and scalable AWS infrastructure using Terraform, achieving full IaC adoption and a 75% reduction in manual effort.
- Led Kubernetes platform engineering and management of production-grade EKS clusters, maintaining 99.99% availability for critical applications.
- Orchestrated API gateway and ingress architecture to efficiently handle over 100K daily microservices requests, ensuring robust security and performance.
- Transformed CI/CD processes by migrating from Jenkins to GitHub Actions, standardizing workflows and facilitating daily secure releases across teams.
- Developed centralized observability systems with ELK, Prometheus, and Grafana, enhancing monitoring capabilities and reducing Mean Time to Recovery (MTTR).
- Integrated MLOps workflows into Kubernetes environments, automating extensive machine learning model training and deployment to streamline operations.

Capgemini Technology Solutions — Bengaluru

Professional II — 07/2022 - 09/2023

- Implemented scalable CI/CD pipelines using Jenkins, Docker, Git, and Kubernetes, increasing deployment velocity by 40% across digital platforms.
- Automated cloud infrastructure provisioning on AWS with Terraform, ensuring resilient and standardized environments for improved scalability.
- Enhanced Kubernetes deployment processes through Helm, reducing release inconsistencies and achieving a 30% decrease in deployment failures.
- Instituted monitoring solutions using Prometheus and Grafana, strengthening system reliability and reducing incident response time by 20%.
- Led production incident management initiatives, conducted root cause analysis, and decreased recurring issues by 25%, significantly improving system stability.

Societe Generale — Bengaluru

Specialist Software Engineer — 01/2022 - 06/2022

- Established Git branching strategies and review frameworks, enhancing collaboration and reducing merge conflicts by 40%.
- Led AWS migration of on-premise applications, optimizing costs by 25% and improving scalability and system availability.
- Automated configuration management using Ansible, cutting manual effort by 70% and ensuring consistent deployments across environments.
- Enhanced Kubernetes orchestration, improving resource utilization by 30% and minimizing deployment issues, ensuring efficient operations.

Experience

Motorola Solutions (Kodiak Networks)
Bengaluru

Analyst – Customer Success
12/2020 - 01/2022

- Streamlined workflows through Git-based version control, reducing merge conflicts by 30% and enhancing team collaboration.
- Managed and optimized CI/CD pipelines with Jenkins, achieving a 40% reduction in release cycle times.
- Designed and deployed scalable Kubernetes clusters on AWS (EKS), ensuring 99.9% uptime and application resilience.
- Led initiatives on Docker containerization, ensuring consistent and reliable environments across development, testing, and production.
- Orchestrated container workloads with Kubernetes, improving system reliability by 25% through efficient horizontal scaling.
- Collaborated with QA teams to implement automated testing frameworks, leading to a 35% reduction in post-release defects.

BNP Paribas
Chennai

Associate Level I
08/2018 - 04/2020

- Developed Jenkins pipelines as code, automating CI/CD for builds, tests, and deployments, shortening release timelines by 40%.
- Enabled microservices automation using Jenkins and Git, enhancing release frequency and cutting errors by 30%.
- Implemented JFrog Artifactory for artifact lifecycle management, improving package distribution speed by 25%.
- Established effective monitoring frameworks with Prometheus and Grafana, enhancing proactive issue detection and mitigating bottlenecks by 35%.

State Street HCL Services
Chennai, India

Sr Analyst
09/2017 - 07/2018

- Managed Linux system installations and configurations, ensuring 99.99% uptime for critical applications.
- Led upgrades for 250 packages and 50 kernels, enhancing system stability by 75%.
- Implemented monitoring tools, contributing to proactive issue detection and 20% faster resolution times.
- Collaborated with cross-functional teams to align technical solutions with business requirements, driving project success.

State Street HCL Services
Chennai, India

Analyst
05/2015 - 12/2016

- Administered Linux servers, maintaining 95%+ SLA adherence through proactive monitoring and incident response.
- Systematized routine administrative tasks via Shell scripting, enhancing operational efficiency by 30%.
- Monitored CPU, memory, and disk utilization to prevent outages, achieving a 40% reduction in downtime.
- Implemented best practices in system performance tuning, contributing to overall system reliability and maintainability.

Education

SV University, Tirupati
Tirupati

MBA
2010 - 2012
