

VENKATESWARLU DERANGULA

Senior DevOps Engineer | Kubernetes | Terraform & IaC

vderangula44@gmail.com • +91 7780569119 • www.linkedin.com/in/venkateswarlu-derangula • India • Open to Relocation

Summary

DevOps and platform engineering professional with around 10 years of experience delivering infrastructure automation, container platforms, CI/CD, and production reliability. Hands-on delivery experience includes AWS, Terraform, Kubernetes, CI/CD, Docker, Ansible. Holds AWS Certified Solutions Architect – Professional, Certified Kubernetes Administrator (CKA), Google Cloud Certified Professional Cloud Architect certifications.

Skills

GCP • Terraform • Kubernetes • DevOps • DevSecOps • Python • Bash • IAC • Git • RDS • CICD • AWS • Microservices • Azure • Airflow • Prometheus • Grafana • ELK Stack • Nginx • API Gateway • Jenkins • GitHub Actions • Docker • EC2 • S3 • AWS Lambda • Ansible • Sonar • GitLab CI • JFrog Artifactory • GitHub • PostgreSQL • Splunk • Linux • ARM Templates • Azure DevOps

Certifications

AWS Certified Solutions Architect – Professional
Certified Kubernetes Administrator (CKA)
Google Cloud Certified Professional Cloud Architect

Experience

Infinite Computer Solutions

Bengaluru

Technical Lead

09/2023 - Present

- Provisioned scalable, secure AWS infrastructure via Terraform, achieving full IaC adoption and reducing manual effort by 75%.
- Led Kubernetes platform engineering, managing production-grade EKS clusters to maintain 99.99% availability.
- Orchestrated API gateway and ingress architecture to securely handle over 100K microservices requests daily.
- Drove CI/CD transformation by migrating Jenkins to GitHub Actions, standardizing workflows, enhancing security, and enabling daily releases.
- Created centralized observability systems, enhancing monitoring and reducing MTTR through tools like ELK, Prometheus, and Grafana.
- Integrated MLOps workflows into Kubernetes platforms for automating machine learning model training, validation, and deployment.

Capgemini Technology Solutions

Bengaluru

Professional II

07/2022 - 09/2023

- Implemented CI/CD pipelines using Jenkins, Docker, Git, and Kubernetes, accelerating deployment velocity by 40% across digital platforms.
- Automated cloud infrastructure provisioning on AWS using Terraform, ensuring scalable, resilient, and standardized environments.
- Streamlined Kubernetes deployment processes through Helm standardization, reducing release inconsistencies and deployment failures.
- Instituted monitoring and observability frameworks using Prometheus and Grafana, strengthening system reliability and incident response.
- Led production incident management and root cause analysis, reducing recurring issues by 25% and improving system stability.

Societe Generale

Bengaluru

Specialist Software Engineer

01/2022 - 06/2022

- Established Git branching strategies and code review frameworks, improving collaboration efficiency and reducing merge conflicts by 40%.
- Led migration of on-premise applications to AWS (EC2, S3, RDS, Lambda), optimizing infrastructure costs by 25% while enhancing scalability.
- Automated configuration management using Ansible, reducing manual efforts by 70% and ensuring deployment consistency.
- Improved Kubernetes-based container orchestration, improving resource utilization by 30% and minimizing deployment failures.

Motorola Solutions (Kodiak Networks)

Bengaluru

Analyst – Customer Success

12/2020 - 01/2022

- Streamlined workflows through Git-based version control strategies, reducing merge conflicts by 30% and improving collaboration.
- Managed and optimized Jenkins-driven CI/CD pipelines, reducing release cycle times by 40%.
- Designed and deployed Kubernetes clusters on AWS (EKS), achieving 99.9% uptime and enhanced application scalability.
- Led containerization initiatives using Docker, ensuring environment consistency across development, testing, and production.
- Orchestrated container workloads on Kubernetes, enabling horizontal scaling and improving system reliability by 25%.
- Collaborated with QA teams to implement automated testing frameworks, reducing post-release defects by 35%.

Experience

BNP Paribas	Chennai
Associate Level I	08/2018 - 04/2020
• Developed Jenkins pipelines as code, automating build, test, and deployment workflows, reducing release timelines by 40%. • Enabled automation in microservices environments using Jenkins and Git, improving release frequency and reducing errors by 30%. • Enforced JFrog Artifactory for artifact lifecycle management, accelerating package distribution and improving delivery efficiency by 25%. • Established monitoring frameworks using Prometheus and Grafana, enhancing proactive issue detection and reducing bottlenecks by 35%.	
State Street HCL Services	Chennai, India
Sr Analyst	09/2017 - 07/2018
• Performed Linux system installation, configuration, and management. • Increased system stability by 75% through managing 250 package installations and conducting 50 kernel upgrades. • Troubleshoot various issues to minimize downtime.	
State Street HCL Services	Chennai, India
Analyst	05/2015 - 12/2016
• Administered Linux servers ensuring 95%+ SLA adherence. • Systematized routine administrative tasks using Shell scripting. • Monitored CPU, memory, and disk utilization to prevent outages.	

Education

SV University, Tirupati	Tirupati
MBA	2010 - 2012
SV University, Tirupati	Tirupati
B.Com. (Computer Applications)	2007 - 2010
