

VENKATESWARLU DERANGULA

Senior DevOps Engineer | Kubernetes | Observability

vderangula44@gmail.com • +91 7780569119 • www.linkedin.com/in/venkateswarlu-derangula • India • Open to Relocation

Summary

DevOps and platform engineering professional with around 10 years of experience delivering infrastructure automation, container platforms, CI/CD, and production reliability. Hands-on delivery experience includes AWS, Terraform, Kubernetes, CI/CD, Docker, Ansible. Holds AWS Certified Solutions Architect – Professional, Certified Kubernetes Administrator (CKA), Google Cloud Certified Professional Cloud Architect certifications.

Skills

Kubernetes • Docker • Git • Ansible • AWS • Terraform • CICD • Jenkins • Prometheus • Grafana • MLOps • Microservices • Observability • Azure • GCP • DevSecOps • Airflow • IAC • ELK Stack • Nginx • API Gateway • GitHub Actions • EC2 • S3 • RDS • AWS Lambda • Sonar • GitLab CI • JFrog Artifactory • GitHub • Python • Bash • PostgreSQL • Splunk • Linux • ARM Templates

Certifications

AWS Certified Solutions Architect – Professional
Certified Kubernetes Administrator (CKA)
Google Cloud Certified Professional Cloud Architect

Experience

Infinite Computer Solutions

Bengaluru

Technical Lead

09/2023 - Present

- Provisioned scalable, secure AWS infrastructure via Terraform, achieving full IaC adoption and reducing manual effort by 75%.
- Led Kubernetes platform engineering, ensuring 99.99% availability for production-grade EKS clusters while enhancing resilience and performance.
- Designed a robust API gateway and ingress architecture, securely handling over 100K microservices requests daily, optimizing response times.
- Spearheaded CI/CD transformation by migrating Jenkins to GitHub Actions, standardizing workflows, improving security posture, and enabling seamless daily releases.
- Established centralized observability systems with ELK, Prometheus, and Grafana, significantly enhancing monitoring capabilities and reducing MTTR.
- Integrated MLOps workflows into Kubernetes, automating machine learning model training and deployment, which improved process efficiency by 30%.

Capgemini Technology Solutions

Bengaluru

Professional II

07/2022 - 09/2023

- Designed and implemented CI/CD pipelines using Jenkins, Docker, and Git, accelerating deployment velocity by 40% across digital platforms.
- Automated cloud infrastructure provisioning on AWS with Terraform, ensuring scalable and standardized environments that enhanced system reliability.
- Streamlined Kubernetes deployment processes through Helm, significantly reducing release inconsistencies and lowering deployment failures across teams.
- Established robust monitoring and observability frameworks with Prometheus and Grafana, leading to a marked improvement in incident response time.
- Led production incident management and conducted thorough root cause analysis, reducing recurring issues by 25% and boosting overall system stability.

Societe Generale

Bengaluru

Specialist Software Engineer

01/2022 - 06/2022

- Established Git branching strategies and code review frameworks, enhancing collaboration efficiency and reducing merge conflicts by 40%.
- Led the migration of on-premise applications to AWS (EC2, S3, RDS, Lambda), optimizing infrastructure costs by 25% while increasing scalability and resilience.
- Automated configuration management using Ansible, which minimized manual intervention by 70% and ensured consistent deployment practices across environments.
- Enhanced Kubernetes-based container orchestration, improving resource utilization by 30% and significantly decreasing deployment failures for applications.

Experience

Motorola Solutions (Kodiak Networks)

Bengaluru

Analyst – Customer Success

12/2020 - 01/2022

- Streamlined workflows using Git version control, reducing merge conflicts by 30% and enhancing team collaboration.
- Managed Jenkins-driven CI/CD pipelines, leading to a 40% decrease in release cycle times and improved deployment efficiency.
- Designed and deployed production-grade Kubernetes clusters on AWS (EKS), achieving 99.9% uptime and ensuring scalable application performance.
- Led initiatives for Docker containerization, providing consistent application environments across development, testing, and production stages.
- Orchestrated container workloads on Kubernetes, facilitating horizontal scaling and boosting system reliability by 25% for customer-facing applications.
- Collaborated with QA teams to implement automated testing frameworks, resulting in a 35% reduction in post-release defects and improved product quality.

BNP Paribas

Chennai

Associate Level I

08/2018 - 04/2020

- Developed Jenkins pipelines as code, automating build, test, and deployment workflows, enabling 40% faster release timelines.
- Enhanced microservices automation with Jenkins and Git, increasing release frequency and reducing errors by 30%.
- Enforced JFrog Artifactory for artifact lifecycle management, accelerating package distribution and improving delivery efficiency by 25%.
- Established monitoring frameworks using Prometheus and Grafana, facilitating proactive issue detection and decreasing bottlenecks by 35%.

State Street HCL Services

Chennai, India

Sr Analyst

09/2017 - 07/2018

- Configured and managed Linux systems to enhance stability and performance for production environments.
- Achieved a 75% improvement in system reliability through strategic management of 250 software package installations.
- Conducted 50 kernel upgrades, ensuring optimal system performance and security.
- Implemented troubleshooting protocols that minimized system downtime, resulting in improved operational efficiency.

State Street HCL Services

Chennai, India

Analyst

05/2015 - 12/2016

- Ensured 95%+ SLA adherence on Linux servers, optimizing system performance and reliability.
- Automated routine administrative tasks with Shell scripting, increasing efficiency by 30%.
- Monitored CPU, memory, and disk utilization, proactively preventing outages and ensuring system stability.
- Implemented best practices for security, contributing to a robust operational environment in line with DevSecOps principles.

Education
