

VENKATESWARLU DERANGULA

Senior DevOps Engineer | AWS | Azure

vderangula44@gmail.com • +91 7780569119 • www.linkedin.com/in/venkateswarlu-derangula • India • Open to Relocation

Summary

DevOps and platform engineering professional with around 10 years of experience delivering infrastructure automation, container platforms, CI/CD, and production reliability. Hands-on delivery experience includes AWS, Terraform, Kubernetes, CI/CD, Docker, Ansible. Profile-aligned Azure capabilities include Azure, Azure DevOps, ARM Templates, AKS. Holds AWS Certified Solutions Architect – Professional, Certified Kubernetes Administrator (CKA), Google Cloud Certified Professional Cloud Architect certifications.

Skills

Azure • Azure DevOps • ARM Templates • AKS • AWS • RDS • EC2 • S3 • AWS Lambda • CloudWatch • EKS • GitHub Actions • Terraform • Docker • Kubernetes • Linux • Prometheus • Grafana • JFrog Artifactory • DevOps • Python • Bash • IAC • Git • Sonar • GitHub • Problem-Solving • Observability • Platform Engineering • GCP • Microservices • DevSecOps • Airflow • ELK Stack • Nginx • API Gateway

Certifications

AWS Certified Solutions Architect – Professional
Certified Kubernetes Administrator (CKA)
Google Cloud Certified Professional Cloud Architect

Experience

Infinite Computer Solutions

Bengaluru

Technical Lead

09/2023 - Present

- Provisioned scalable, secure AWS infrastructure using Terraform, achieving full IaC adoption and reducing manual effort by 75%.
- Managed production-grade EKS clusters, ensuring 99.99% availability through effective Kubernetes platform engineering and performance profiling.
- Implemented CI/CD pipelines by migrating Jenkins to GitHub Actions, standardizing workflows to enhance security and enable daily release cycles.
- Developed centralized observability systems leveraging Prometheus and Grafana, substantially reducing MTTR and improving incident response times.
- Integrated security tools like SonarQube into processes, enhancing code quality and compliance within CI/CD workflows.
- Automated ML model management within Kubernetes platforms, utilizing Airflow for optimized data pipelines and streamlined deployment.

Capgemini Technology Solutions

Bengaluru

Professional II

07/2022 - 09/2023

- Implemented CI/CD pipelines using GitHub Actions and Docker, increasing deployment frequency by 40% across multiple projects.
- Automated cloud infrastructure provisioning on AWS with Terraform, resulting in standardized, scalable environments that improved resilience.
- Streamlined Kubernetes processes with Helm, leading to a 30% reduction in release inconsistencies and deployment failures.
- Instituted monitoring solutions using Prometheus and Grafana, enhancing system observability and incident response capabilities.
- Led production incident management, achieving a 25% decrease in recurring issues and significantly boosting system stability.

Societe Generale

Bengaluru

Specialist Software Engineer

01/2022 - 06/2022

- Established robust Git branching strategies and code review frameworks, enhancing collaboration and reducing merge conflicts by 40%.
- Led migration of on-premise applications to AWS resources including EC2 and S3, reducing infrastructure costs by 25% while improving scalability and performance.
- Automated configuration management with Ansible, decreasing manual efforts by 70% and ensuring deployment consistency across environments.
- Optimized Kubernetes deployments, enhancing container orchestration effectiveness, improving resource utilization by 30%, and reducing deployment errors.

Experience

Motorola Solutions (Kodiak Networks)

Bengaluru

Analyst – Customer Success

12/2020 - 01/2022

- Streamlined workflows using GitHub Actions, reducing merge conflicts by 30% and enhancing team collaboration across projects.
- Optimized and managed Jenkins-driven CI/CD pipelines, cutting release cycle times by 40% for faster software delivery.
- Designed and deployed highly available Kubernetes clusters on AWS (EKS), achieving 99.9% uptime and improving application scalability by 50%.
- Led containerization initiatives with Docker, ensuring consistent development, testing, and production environments, and reducing deployment times by 20%.
- Orchestrated and managed container workloads using Kubernetes, increasing system reliability by 25% through effective horizontal scaling strategies.
- Collaborated with QA teams to implement automated testing frameworks, resulting in a 35% reduction in post-release defects and improved code quality.

BNP Paribas

Chennai

Associate Level I

08/2018 - 04/2020

- Automated CI/CD workflows by developing Jenkins pipelines as code, resulting in a 40% reduction in release timelines.
- Integrated GitHub Actions for enhanced automation in microservices, increasing release frequency and decreasing errors by 30%.
- Implemented JFrog Artifactory for efficient artifact lifecycle management, boosting delivery efficiency by 25%.
- Established robust monitoring solutions with Prometheus and Grafana, enabling proactive issue detection and reducing bottlenecks by 35%.

State Street HCL Services

Chennai, India

Sr Analyst

09/2017 - 07/2018

- Executed management of Linux systems, enhancing operational efficiency across multiple environments.
- Achieved a 75% increase in system stability through effective package management and kernel upgrades.
- Developed and automated deployment processes, significantly reducing downtime and improving responsiveness.
- Spearheaded troubleshooting initiatives, effectively minimizing incident resolution time and enhancing overall system reliability.

State Street HCL Services

Chennai, India

Analyst

05/2015 - 12/2016

- Administered Linux servers, maintaining over 95% SLA adherence and enhancing system reliability.
- Streamlined routine administrative tasks through Shell scripting, boosting efficiency by 30%.
- Monitored CPU, memory, and disk utilization, implementing proactive measures to prevent outages.
- Collaborated with cross-functional teams to optimize server performance and reduce downtime by 20%.

Education

SV University, Tirupati
