

VENKATESWARLU DERANGULA

Senior Platform Engineer | AWS | Kubernetes

vderangula44@gmail.com • +91 7780569119 • www.linkedin.com/in/venkateswarlu-derangula • India • Open to Relocation

Summary

DevOps and platform engineering professional with around 10 years of experience delivering infrastructure automation, container platforms, CI/CD, and production reliability. Hands-on delivery experience includes AWS, Terraform, Kubernetes, CI/CD, Docker, Ansible. Holds AWS Certified Solutions Architect – Professional, Certified Kubernetes Administrator (CKA), Google Cloud Certified Professional Cloud Architect certifications.

Skills

AWS • Azure • GCP • Kubernetes • Terraform • Python • Bash • Helm • CICD • Observability • DevOps • MLOps • Microservices • DevSecOps • Airflow • IAC • Prometheus • Grafana • ELK Stack • Nginx • API Gateway • Jenkins • GitHub Actions • Docker • Git • EC2 • S3 • RDS • AWS Lambda • Ansible • Sonar • GitLab CI • JFrog Artifactory • GitHub • PostgreSQL • Splunk

Certifications

AWS Certified Solutions Architect – Professional
Certified Kubernetes Administrator (CKA)
Google Cloud Certified Professional Cloud Architect

Experience

Infinite Computer Solutions

Bengaluru

Technical Lead

09/2023 - Present

- Provisioned scalable, secure AWS infrastructure via Terraform, achieving full Infrastructure as Code (IaC) adoption and cutting operational manual efforts by 75%.
- Led Kubernetes platform engineering for production-grade EKS clusters, ensuring a 99.99% uptime and increasing system reliability.
- Orchestrated API gateway architecture to securely manage over 100K microservices requests daily, enhancing performance across platforms.
- Transformed CI/CD by migrating from Jenkins to GitHub Actions, standardizing practices that enabled daily releases with improved security.
- Developed centralized observability systems with ELK, Prometheus, and Grafana, reducing Mean Time to Recovery (MTTR) through enhanced monitoring.
- Integrated MLOps workflows into Kubernetes, streamlining machine learning model lifecycle management and boosting deployment efficiency.

Capgemini Technology Solutions

Bengaluru

Professional II

07/2022 - 09/2023

- Designed and implemented CI/CD pipelines using Jenkins and Git, boosting deployment frequency by 40% across platforms.
- Automated AWS cloud infrastructure provisioning with Terraform, enhancing scalability and reducing setup time by 35%.
- Standardized Helm usage for Kubernetes deployments, leading to a 50% decrease in release failures and inconsistencies.
- Established observability frameworks with Prometheus and Grafana, improving incident response times and system uptime.
- Led root cause analysis for production incidents, decreasing issue recurrence by 25% and strengthening overall stability.

Societe Generale

Bengaluru

Specialist Software Engineer

01/2022 - 06/2022

- Established Git branching strategies and code review frameworks, boosting team collaboration efficiency and reducing merge conflicts by 40%.
- Led migration of on-premise applications to AWS (EC2, S3, RDS, Lambda), optimizing infrastructure costs by 25% while enhancing multi-cloud scalability.
- Automated configuration management using Ansible, cutting manual efforts by 70% and ensuring consistent deployment across diverse environments.
- Improved Kubernetes-based container orchestration, enhancing resource utilization by 30% and minimizing deployment failures in a multi-cloud setup.

Experience

Motorola Solutions (Kodiak Networks)

Bengaluru

Analyst – Customer Success

12/2020 - 01/2022

- Streamlined workflows using Git-based version control, enhancing collaboration by decreasing merge conflicts by 30%.
- Managed and optimized CI/CD pipelines with Jenkins, achieving a 40% reduction in release cycle times.
- Designed and deployed EKS Kubernetes clusters, ensuring 99.9% uptime and improved application scalability.
- Led containerization efforts with Docker, maintaining consistent environments across development, testing, and production.
- Orchestrated Kubernetes workloads to enable horizontal scaling, improving system reliability by 25%.
- Collaborated with QA teams to implement automated testing frameworks, resulting in a 35% reduction in post-release defects.

BNP Paribas

Chennai

Associate Level I

08/2018 - 04/2020

- Developed Jenkins pipelines as code, automating build, test, and deployment workflows, resulting in a 40% reduction in release timelines.
- Implemented Terraform for infrastructure provisioning, improving deployment consistency and scaling microservices effectively across environments.
- Enabled automation in microservices environments using Jenkins and Git, improving release frequency and reducing errors by 30%.
- Leveraged Prometheus and Grafana for monitoring frameworks, enhancing proactive issue detection and reducing system bottlenecks by 35%.
- Enforced JFrog Artifactory for artifact lifecycle management, accelerating package distribution, and improving delivery efficiency by 25%.

State Street HCL Services

Chennai, India

Sr Analyst

09/2017 - 07/2018

- Conducted Linux system installation, configuration, and management to enhance service reliability across multi-cloud environments.
- Increased system stability by 75% through efficient management of over 250 package installations and 50 kernel upgrades.
- Implemented proactive troubleshooting measures resulting in a significant reduction in downtime.
- Utilized automation tools for configuration management, streamlining operational efficiency and supporting CI/CD processes.

State Street HCL Services

Chennai, India

Analyst

05/2015 - 12/2016

- Administered Linux servers to meet 95%+ SLA adherence, ensuring high system availability.
- Systematized routine tasks using Shell scripting, reducing manual efforts and increasing operational efficiency by 30%.
- Monitored CPU, memory, and disk utilization, implementing proactive measures that minimized outages.
- Collaborated with cross-functional teams to enhance system reliability and streamline infrastructure provisioning process.
