

VENKATESWARLU DERANGULA

Senior Platform Engineer | AWS | Kubernetes

vderangula44@gmail.com • +91 7780569119 • www.linkedin.com/in/venkateswarlu-derangula • India • Open to Relocation

Summary

DevOps and platform engineering professional with around 10 years of experience delivering infrastructure automation, container platforms, CI/CD, and production reliability. Hands-on delivery experience includes AWS, Terraform, Kubernetes, CI/CD, Docker, Ansible. Holds AWS Certified Solutions Architect – Professional, Certified Kubernetes Administrator (CKA), Google Cloud Certified Professional Cloud Architect certifications.

Skills

AWS • Terraform • Kubernetes • DevOps • Grafana • Observability • SRE • Azure • Git • Python • Splunk • Linux • CI/CD • GitHub Actions • Docker • Prometheus • MLOps • Problem-Solving • Cloud Platforms • GCP • Microservices • DevSecOps • Airflow • IAC • ELK Stack • Nginx • API Gateway • Jenkins • EC2 • S3 • RDS • AWS Lambda • Ansible • Sonar • GitLab CI • JFrog Artifactory

Certifications

AWS Certified Solutions Architect – Professional
Certified Kubernetes Administrator (CKA)
Google Cloud Certified Professional Cloud Architect

Experience

Infinite Computer Solutions

Bengaluru

Technical Lead

09/2023 - Present

- Provisioned scalable and secure AWS infrastructure via Terraform, achieving full IaC adoption and a 75% reduction in manual operations.
- Led Kubernetes platform engineering, managing production-grade EKS clusters with 99.99% uptime by implementing robust monitoring practices.
- Orchestrated API gateway and ingress architecture to securely process over 100K microservice requests daily, enhancing system reliability.
- Transitioned CI/CD pipelines from Jenkins to GitHub Actions, standardizing workflows, and enabling daily releases with improved security measures.
- Developed centralized observability solutions utilizing ELK, Prometheus, and Grafana, significantly reducing MTTR and enhancing incident response capabilities.
- Integrated MLOps workflows into Kubernetes platforms, streamlining automated model training, validation, and deployment processes.

Capgemini Technology Solutions

Bengaluru

Professional II

07/2022 - 09/2023

- Automated cloud infrastructure provisioning on AWS with Terraform, achieving scalable and resilient environments that enhanced cloud resource efficiency.
- Instituted CI/CD pipelines utilizing Jenkins, Docker, and Git, accelerating deployment velocity by 40% and improving go-to-market strategies.
- Standardized Kubernetes deployment processes via Helm, minimizing release inconsistencies, and achieving a 30% reduction in deployment failures.
- Implemented comprehensive monitoring frameworks using Prometheus and Grafana, which elevated system observability and improved incident response times by 25%.
- Led production incident management efforts with a focus on problem management, successfully reducing recurring incidents by 25% and enhancing overall system.

Societe Generale

Bengaluru

Specialist Software Engineer

01/2022 - 06/2022

- Established Git branching strategies and code review frameworks, improving collaboration efficiency and reducing merge conflicts by 40%.
- Led migration of on-premise applications to AWS (EC2, S3, RDS, Lambda), optimizing infrastructure costs by 25% and enhancing platform scalability.
- Automated configuration management using Ansible, reducing operational efforts by 70% and ensuring consistent deployments across environments.
- Enhanced Kubernetes orchestration practices, improving resource utilization by 30% and minimizing deployment failures through streamlined processes.

Experience

Motorola Solutions (Kodiak Networks)

Bengaluru

Analyst – Customer Success

12/2020 - 01/2022

- Implemented Infrastructure as Code with Terraform, facilitating consistent and rapid provisioning of AWS resources.
- Enhanced CI/CD pipelines in Jenkins, achieving 40% faster deployment cycles and minimizing manual interventions.
- Developed monitoring solutions using Grafana and Prometheus, boosting system observability and reducing incident response times by 30%.
- Spearheaded container orchestration in AWS EKS, maintaining high availability with 99.9% uptime during peak loads.
- Standardized DevOps practices across teams, significantly increasing collaboration and reducing deployment errors by 35%.
- Managed incident and problem management processes, ensuring swift resolution and maintaining service continuity.

BNP Paribas

Chennai

Associate Level I

08/2018 - 04/2020

- Automated CI/CD pipelines by implementing Jenkins as code, accelerating release timelines by 40% through efficient build and deployment workflows.
- Integrated Terraform to facilitate Infrastructure as Code, enabling rapid microservices deployment and reducing release errors by 30%.
- Leveraged JFrog Artifactory for comprehensive artifact lifecycle management, optimizing package distribution and enhancing delivery efficiency by 25%.
- Established observability practices using Prometheus and Grafana, improving proactive issue detection and reducing operational bottlenecks by 35%.

State Street HCL Services

Chennai, India

Sr Analyst

09/2017 - 07/2018

- Executed Linux system installation and management, ensuring optimal configurations and security standards.
- Achieved a 75% increase in system stability by effectively administering 250 packages and executing 50 kernel upgrades.
- Implemented automated monitoring solutions, leading to a 30% reduction in troubleshooting time and minimized system downtime.
- Enhanced incident management processes by utilizing ITSM practices, improving response times to incidents significantly.

State Street HCL Services

Chennai, India

Analyst

05/2015 - 12/2016

- Administered Linux servers, achieving 95%+ SLA adherence through effective incident and change management practices.
- Systematized routine administrative tasks using Shell scripting, automating 30% of daily operations.
- Monitored CPU, memory, and disk utilization to prevent outages, resulting in a 15% reduction in downtime incidents.
- Participated in regular disaster recovery activities, ensuring preparedness for critical service restoration.
